丁腈胶 防移动

产品优势

在原材料选用方面精益求精，严格把控质量关，一直以来坚持使用纯PVC原生料，搭配无钙生产工艺，确保泡孔均匀、紧密，回弹性能卓越优秀，当受到外力冲击时产品表面恢复性好，没有深坑凹陷及创伤痕迹现象的发生。

In the selection of raw materials, excellence, strict quality control, has always insisted on the use of pure PVC raw materials, with calcium-free production technology, to ensure that the bubble cells are uniform and tight, the resilience is excellent, when the impact of external force is the product surface recovery is good, there is no deep pit depression and wound traces of the phenomenon.

PUR面层处理技术

1. **超耐磨:**材料本身为产品提供优秀的耐磨性；
2. **超耐划:**PUR技术增加了产品表层硬度，更耐划；
3. **超耐污:**PUR技术为产品表层提供保护，有效减缓产生黑脚印、鞋印划痕、篮球划痕、油污污染等现象；
4. **易打理:**不会因油性物质污染地胶表面，便于日常维护打理，长期使用后表面颜色依旧保持光鲜亮丽。

Super wear resistance: the material itself provides excellent wear resistance for the product, super scratch resistance: PUR technology increases the hardness of the surface layer of the product, which is more scratch resistant;
Super stain resistance: PUR technology provides protection for the surface of the product, effectively slows down the phenomenon of black footprints, shoe print scratches, basketball scratches, oil pollution and other phenomena, easy to take care of: it will not pollute the surface of the rubber due to oily substances, which is convenient for daily maintenance and care, and the surface color remains bright and bright after long-term use.
